

## ASK FOR BIDS ON NEW INCINERATOR

City Plans to Construct New Plant Within Few Months

Bids for the construction and equipment of an incinerating or crematory plant will be opened by the city within a few days. At the meeting of the city commission Tuesday morning it was voted to immediately advertise for bids for this project, which is to be of not less than 40 tons daily capacity and cost not more than \$25,000. The remainder of the \$50,000 bond issue is to be used to equip the city to handle all garbage and trash with wagons and trucks.

The incinerator contractor who attended the meeting Tuesday, explained that if his company is the successful bidder, it will guarantee to install a plant that is entirely self-contained. The city would be given 10 days in which to operate the plant and discover whether the manufacturer's claims were justified. This plant, according to the agent, is warranted to dispose of garbage, trash, dead animals or anything else that is susceptible to cremation, with virtually no smoke and with absolutely no odor. The city, according to Mayor T. D. Black, intends to obtain a binding guarantee from the successful bidder to avoid a repetition of the incinerating plant that was built several years ago and which has never been used.

Whether the building occupied by this new but unused plant can be utilized for the new plant has not been decided. The mayor pointed out Tuesday that the building itself is not so important as the cremation equipment it contains, and that if the present building can be used, several thousand dollars will be saved to the city.

The notice for bids is to be published for five consecutive days, and then 10 days must elapse, according to law, before they may be opened and the contract awarded.

## NEW VIEWS AT NIAGARA

Government Control on Both Sides of River Has Transformed Ugly Spots Into Places of Beauty.

There's a great deal more to see, that's worth while, at Niagara, than there used to be. Government control on both sides of the river, has transformed unattractive places into attractive ones. The ugly, old lines, in the gorge, "The Great Gorge Route" and on both sides of the river, have extended the easy trips of the visitor, who can now readily go from the falls to Lewiston and to old Fort Niagara, on the American side; and on the Canadian, from Queenston Heights to Chippewa, above the Great Falls.

The plans of the power companies, on either side of the river, have added a new element of interest. Nowhere else is the electrical utilization of water power to be seen on so large a scale.

More than half a million horsepower are now available for use at Niagara, or transmission to distant points. Cities in New York state as far distant as Syracuse have for some years been receiving Niagara power.

Is distribution in Canada, to nearby towns, to Hamilton and Toronto, is also large. The total available potentiality of Niagara Falls, possible of conversion and use, is estimated at 7,500,000 horsepower.

Obviously, water taken from the river above the cataracts, and directed through canals and tunnels, causes the amount that goes over the falls, but the proportion is so small that the visitor sees no difference. An ice jam or an east wind that lowers the level at the eastern end of Lake Erie, affects the appearance of the falls far more than has been done by the power companies.

The buildings of the power plants are mostly of the native rock and harmonize with the surrounding scenery. Good taste, too, has been shown in the erection of structures on the reservations, for the convenience of visitors. The bridges which connect the mainland with the Goat Island group are broad, graceful structures with rough stone parapets, their wide, low arches add to, rather than take from, the attractiveness of this beautiful spot.

The city of Niagara Falls in recent years has experienced remarkable development. This has been largely due to the electrical utilization of Niagara power. A great group of factories, many of them employing electro-chemical processes, now form an "upper factory district" which for the engineer, the chemist and the electrician, is a neighborhood of the greatest interest.

## INDIAN FAIR IN SEPTEMBER

Will Be Separate and Distinct From Exhibits of Whites.

Special to The World. PONCA CITY, July 19.—Final arrangements have been made here for the first annual Indian livestock and agricultural fair, to be held here at the same time—September 14 to 17, inclusive—and place as the fourth annual Kay county free fair, but to be an entirely separate proposition with the Indians not in competition with the whites. Marvin K. Van Winkle is the Indian fair superintendent.

In addition to premiums for livestock and grains, the local chamber of commerce is offering prizes also for the best beaded belts, moccasins, and other handwork of the Indians, including headgears and complete Indian tribal costumes.

## BERRY GROWERS CONVENE

Organize Association and Plan An Increased Production.

Special to The World. BERNICE, July 19.—The producers of berries around Bernice met Saturday at this place for the purpose of organizing a berry growers association. There was great interest shown, and all seemed to be well pleased with the outlook for a good and profitable business in berry production.

Several outsiders from other berry fields were present and gave very good advice and interesting talks on the subject of berry raising for a profit. An organization was effected and there is nothing to do but go to work and carry out the plan.

## Soft Silk Crepes Make Fall Frocks

Canton crepes and other soft silks are again taking the center of the fashion stage with the advent of new styles in fall frocks. Plain frocks with little or no trimming and very simple cut are the modes usually shown for early fall wear. Of course there are plenty of frocks with colored embroidery and ornate trimmings, but the simpler gowns are the correct thing for early season wear.

Gray canton crepe makes this pleasing model. It is made with a loose, low waisted blouse with set-in kimono sleeves. The skirt is plain and full and piped with navy blue crepe. Navy blue crepe bands also trim the sleeves, the shoulders, the belt and neckline. White pearl buttons, sewed on with navy blue thread, are the only other evidences of trimming. This frock is designed for afternoon wear or it may grace the informal dinner or restaurant supper.

## BETTER PRICES ON CATTLE

Shipments to Market Centers Take on Additional Impetus.

Special to The World.

PAWBUKA, July 19.—The advance in the price of cattle is being reflected in the shipments out of Osage county, among the largest being that of last Saturday when 82 carloads of steers, making a total of 2,460 head, were shipped out over the Midland Valley consigned to Kansas City and St. Louis.

Many of the stock growers of the county bought their stuff on the low market and stand to reap a long profit. Other large operators, however, were caught with high priced cattle and will now begin to get out from under, as this is the time of the year when cattle begin to move. Large shipments may be expected to continue in the next few weeks, should the market hold up.

## plump juicy peaches

Peach jam, peach jelly, peach preserves!

They add a sparkle to the winter menu! Do up all you can.

Use Domino Granulated in all your preserving—a pure cane sugar of the highest quality. It comes to you clean and pure in sturdy cartons and strong cotton bags, accurately weighed, packed and sealed by machine, protected against flies and ants.

## SAVE THE FRUIT CROP

American Sugar Refining Company

"Sweeten it with Domino"

Granulated, Tablet, Powdered, Confectioners, Brown, Golden Syrup.

## PROBE KU-KLUX KLAN

Texas Legislature Entertains Bill; Twenty-six Incidents Already Reported in State.

AUSTIN, Texas, July 19.—Representative Lee Rountree said today he would introduce tomorrow his resolution providing for an investigation of the Ku-Klux Klan in Texas.

The tarring of Mrs. Beulah Johnson of Tenaha, Texas, by masked men Sunday makes the twenty-sixth incident disclosing the activities of secret bands of men in Texas since April 1. Since then three other cases have been reported.

## CONCERT IS AT OWEN PARK

Band Plays Specially on Occasion of Rotary Picnic.

In conjunction with the occasion of the Rotary picnic at Owen park tonight, the municipal band has varied its usual itinerary so as to play at the same place. The music begins at 8:15 as usual, Mr. Parker directing and P. H. Kelly, featuring as cornet soloist. The program as announced follows:

March, "U. S. Marines".....Marx and Waltz Suite, "Wine, Woman and Song".....Strauss  
Cornet solo by Mr. Kelly, selected.  
Overture, "William Tell".....Rossini  
Intermission, seven minutes.  
Gems from "The Red Mill".....Herbert  
Serenata Erythraea, "Aminta".....Tobin  
Tomorrow evening the usual plan will be resumed, the band playing at 8:15 at Locust Grove park.

## Madden of Illinois Is Chairman of Committee

WASHINGTON, July 19.—Representative Martin B. Madden, republican, Illinois, today was elected chairman of the committee of appropriations, succeeding Representative Goode of Iowa, who recently resigned from the house.

Elite Cafe.....First and Boston

## Hopes to Run Osage County Poor Farm on Self-Supporting Basis

Special to The World. PAWBUKA, July 19.—The Osage county poor farm is being placed on a self-supporting basis under the plans of S. S. Gooding, superintendent. The crops produced this year on this farm are better than the average on other farms. With another good year, corn will average 75 bushels to the acre, and the cane and kafir corn crops will be large. Data yielded 600 bushels. "We have as nice a bunch of Poland-China hogs as can be found in the state," said Superintendent Gooding today, "all thoroughlybred and registered."

Mr. Gooding is a business man of Pawhuska who for 11 years has given his time to local charities, including the Red Cross, United Charities and other institutions.

## BRIDGE ON SCENIC HIGHWAY

Fund in Plenty Available With Opening of Fiscal Year.

Special to The World.

PAWBUKA, July 19.—Plans and estimates for the construction of a bridge across Rock creek on the Pawhuska-Hartsville scenic highway have been submitted to the board of equalization and will be passed upon in the next ten days. With the coming of the new fiscal year, ample funds are available for the construction of this bridge, which will mean the completion of one of the most beautiful highways in Oklahoma.

The roadwork has now been completed by County Engineer W. M. Clark and presented a number of engineering problems, quarrying through the hills permitting a cut-off. With the erection of the Rock creek bridge quick time will be possible between the two cities.

## ENLARGE ELECTRIC PLANT

Increased Demand for Lighting Makes Improvement Necessary.

Special to The World. PAWBUKA, July 19.—Plans under consideration by city commissioners contemplate the enlargement of the electric light plant to increase the present capacity 50 per cent. The three engines now in use, two of gas and one of steam, are carrying peak loads at night and two of them are constantly in use during the day. It is proposed in the enlarged plant to have at least one engine at rest day and night.

"The demand for electric lighting," said J. J. Quarles, city commissioner, "is before the Chamber of Commerce, the greater than that for water. It is properly handled by the city and is a matter of paying the expenses of the city and the people who use the lights and power will get it at a low rate."

## Craig County Free Fair.

Special to The World.

VINITA, July 19.—The seventh annual free fair for Craig county is to be held here September 14-17, and the indications are that it will surpass all previous records in the variety and magnitude of exhibits. The catalog, containing premium list, rules and regulations, has been gotten out and is being distributed. The management is doing its utmost to make this the greatest county attraction of the kind in this part of the state. Patrons and exhibitors will find that everything possible has been done for their convenience and comfort.
